About the project your purchase will support

For every copy sold, Excel Financial Advisors will be giving access to clean water for a family in Ethiopia for a year.

Without a village well, women in the northern Ethiopian province of Tigray spend on an average of 3 hours every day collecting polluted water for their families from sources often shared with defecating livestock. Children, especially girls, help collect water instead of going to school.

The funds we give will be used in the construction of hand-dug water wells, constructed using portable equipment and village labour. Access to clean water provided by these wells:

- eliminates water borne diseases;
- frees time for family care & income producing activities;
- allows children the time to attend school; and
- helps break the poverty cycle.
